## INTRODUCTION

The Parties to the Basel Convention are required, in accordance with Articles 13 and 16 of the Convention, to inform each other, through the Secretariat of the Basel Convention, on issues related to the implementation of the Basel Convention. To facilitate reporting by Parties, the secretariat has revised the questionnaire on “Transmission of Information”. The revised questionnaire consists of two parts, namely, Part I: Status of information; and Part II: Annual reporting.

Part I: Status of information: to further facilitate reporting, Part I of the questionnaire is pre-filled by the secretariat (provided that Parties have reported for the year 1999 and/or onwards, in the required format).

Part I essentially covers those issues for which information provided by Parties usually remains the same as that reported during the previous year(s). While updating the pre-filled questionnaire, if there is any change in the information provided (including necessary corrections or deletions) during the previous reporting period, it needs to be indicated by Parties in the right hand column of the questionnaire by ticking the box stating “yes” and accordingly, the corresponding information should also be updated. Using “track changes” function of the ‘Word’ program is recommended to update the information. If there is no change in the information, it is sufficient to indicate it in the right hand column of the questionnaire by ticking the box stating “no”.

Part I: covers issues such as designation of Competent Authority and Focal Point; national definitions of waste; national definitions of hazardous waste; restrictions on transboundary movements of hazardous wastes and other wastes; control procedure of the transboundary movements of waste; reduction and/or elimination of the generation of hazardous wastes and other wastes; reduction of the amount of hazardous wastes and other wastes subject to transboundary movements; effect on human health and the environment; bilateral, multilateral or regional agreements or arrangements; disposal and recovery facilities and sources of technical and financial assistance.

Part II: Annual reporting covers those issues for which reporting is required on an annual basis. For the ease of electronic reporting and processing of the reported data/information, Part II: Annual reporting is divided into two sections namely, Section A and Section B.

Part II: Section A covers issues such as export/import hazardous wastes and other wastes and generation of hazardous wastes and other wastes.

Part II: Section B covers issues such as disposals, which did not proceed as intended and accidents occurring during the transboundary movement and disposal of hazardous wastes and other wastes.

Some of the general guidelines to fill in the questionnaire are:

- Complete the questionnaire in English.
- Ensure that all quantities are in metric tons.
- Complete the questionnaire by providing information/data in the required format.
- Provide an electronic version of the completed questionnaire, if possible, or use a typewriter or else handwritten in block letters for legibility.

The manual could be referred for more information, which is available in all six United Nations languages (Arabic, Chinese, English, French, Russian and Spanish).

The questionnaire and the manual are available both in hard copy as well as in electronic version from the secretariat (Part I and Part II: Section B of the questionnaire are in Word; and Part II: Section A of the questionnaire is in Excel. The manual is in Word).

# PART I: STATUS OF INFORMATION (for the year 2005)

*Note: If there is any update to the pre-filled answer provided in the middle column by your country to this query since the last update, please indicate so on the right column and update all relevant information accordingly!*

|    | <p>According to the Act No. 223/2001 Coll. of Laws on waste and on amendment of certain acts as amended - hazardous waste shall mean waste featuring one or several hazardous characteristics listed in Annex 4 – Hazardous characteristics of wastes (H codes). The Annex 4 is equal to the Annex 3 of the EU Directive 91/689/EEC. The Decree No 284/2001 Coll. of Laws enacting Waste Catalogue as amended by subsequent regulations harmonized with European Waste Catalogue distinguishes two waste categories: - non-hazardous; - hazardous. The annex 2 of this Decree refers to the Basel Convention list of hazardous waste characteristics (H codes). Hazardous wastes are considered wastes:</p> <p>a) Listed in Annex VIII to the Basel Convention;</p> <p>b) Designated as hazardous in the Waste Catalogue;</p> <p>c) Included in the Amber List of Wastes, or included in the Red List of Wastes; and</p> <p>d) Listed in Annex IX to the Basel Convention and containing substances listed in Annex I to the Basel Convention within a scope causing the occurrence of dangerous properties listed in Annex III to the Basel Convention. The annex I of the Basel Convention is used for identification of hazardous wastes in the reporting.</p>   |   |
| 2c | <p><b>Does your country regulate/control any additional wastes as hazardous that are not included in Art. 1 (1)a of the Basel Convention and would be controlled for the purpose of transboundary movements pursuant to Art. 1 (1)b?</b></p> <p><input checked="" type="checkbox"/> Yes      <input type="checkbox"/> No      <input type="checkbox"/> In preparation</p> <p>If yes, please specify those wastes (use additional space/attachment, if required):</p> <p>The national Waste Catalogue covers all types of hazardous waste listed in the European Waste Catalogue. There are marked with the letter “N”. A waste codes ending with two digits “99” (wastes not otherwise specified) have no category. Waste holders classify their waste and eliminate unjustified waste classification into the category non-hazardous in the case, when the composition of the waste is adequately defined and based on its composition it is possible to classify this waste explicitly as hazardous one. According to the first digits of the waste code a source of generation can be identified and then to address the waste a relevant code listed in Annexes I, II, and VIII. In some cases it is not easy to address relevant Y code to a specific code considering the range of Y codes listed in the Annex 1. On the other hand sometimes it is possible to address one or more Y codes according to the Annex 1 of the Basel Convention to one code of hazardous waste listed in the EU-waste list.</p> <p>The national definition of hazardous wastes covers wastes other than those listed in Annexes I, II and VIII of the Basel Convention. The Secretariat of the Basel Convention has made the information transmitted to it, pursuant to article 3 of the Basel Convention, available on the website of the Basel Convention (<a href="http://www.basel.int/natdef/frsetmain.php">http://www.basel.int/natdef/frsetmain.php</a>).</p> <p>Since 1st May 2004 the transboundary movements of wastes is governed by Council Regulation No 259/93/EC on the supervision and control of shipments of waste within, into and out of the European Community as amended by subsequent regulations and the Treaty of Accession of the SR to the EU. Based on the Treaty of Accession of the SR to the EU all consignments of wastes to Slovakia, destined for recovery operations, listed in Annexes II, III, IV of Council Regulation No 259/93/EC, as well as the consignments of wastes not listed in these annexes, will be the subject of notification to the relevant bodies and procedures according to the provisions of the Articles 6, 7 a 8 of Council Regulation No 259/93/EC by 31st December 2011.</p> | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |

Besides the quantitative indicators, also the positive influence on waste characteristics is the goal of the implementation of BATNEEC in order to minimize the risk of negative impacts on the environment and human health.</p> |   |

|       |   |  |
|-------|---|--|
|       | <p>Based on WMP of the SR until 2005 - the guiding part - the priority is in the development plans of an effective system of separate collection, sorting facilities and facilities for recovery of hazardous waste and waste divided to commodities according Art. 5 of the Decree of MoE SR No 283/2001 Coll. of Laws on implementing certain provisions of the act on wastes. There are following commodities: used batteries and accumulators; waste oils; used tyres; wastes from multilayer and combined materials; electronic scrap; waste polyethyleneterephthalate; waste polyethylene; waste polypropylene; waste polystyrene; waste polyvinylchloride; waste from fluorescent tubes containing mercury; waste paper; waste glass; end-of-life vehicles; and bio-degradable waste.</p> <p>Separate collection of waste of required quality and quantity is the fundamental condition for waste recovery. Intensification of the separate collection is expected in some regions.</p> <p>Completion of the technical infrastructure requires:</p> <ul style="list-style-type: none"> <li>- to build new centres for waste collection;</li> <li>- to establish sorting facilities; and</li> <li>- to introduce special sorting lines.</li> </ul> <p>Their number and localities will be controlled by the principles of proximity and self-sufficiency.</p> <p>Sufficient recovery capacities are available in Slovakia to recover waste paper, waste glass, iron scrap, waste lead accumulators and waste oils if they are collected separately in sufficient quantities.</p> <p>In case of waste from tubes containing mercury is a need to complete collection and transportation system, and also complete a plant for recovery of this waste with sufficient capacity.</p> |  |
| (ii)  | <p>Legislation, regulations and guidelines:</p> <p>Regulations given in the part 5 (ii) represent of the current legal status in Slovakia. Transboundary movements of wastes are covered by the Council Regulation No 259/93/EC. Principles of self-sufficiency and proximity are applied to shipments of wastes.</p>   |  |
| (iii) | <p>Economic instruments/initiatives:</p> <ul style="list-style-type: none"> <li>- A fee for landfilling of wastes;</li> <li>- Fees paid to Recycling Fund will be used for waste recovery;</li> <li>- Local fees paid to the municipalities for collection, transport and disposal of municipal waste and construction waste (generators of municipal waste pay local fees);</li> <li>- Financial guarantee covering the costs of re-import and disposal, in case when transboundary movement cannot be completed.</li> </ul>   |  |
| (iv)  | Measures taken by industries/waste generators:  |  |

|          |   |   |

| (v)      | <p>Certain hazardous wastes are managed only by authorised persons. Authorisation means granting consent to an entrepreneur to perform following operations: a) handle spent batteries and accumulators, b) handle waste oils, c) handle end-of life vehicles. Above mentioned operations – under conditions laid down by the Act No. 223/2001 Coll of Law – may only be performed by an entrepreneur authorised by the Ministry, unless stipulated otherwise by this Act. The Ministry may grant authorization for each operation individually or for several operations jointly.</p> <ul style="list-style-type: none"> <li>- Establishment of new technologies – a cleaner production;</li> <li>- Implementation of cleaner production projects;</li> <li>- Establishment and implementation of EMS/EMAS.</li> </ul> <p>Others:</p> <p>None.</p>   |   |
